Cool Metal Projects Creative Ways

In fact, not all printers can print metal. In 3D printing, there are different manufacturing processes. For 3D printing metal, there are three top ways to 3D print—metal-binding jetter, powder bed fusion, and directed energy deposition. These methods use metal powder or metal wires to layer the materials and print the design in 3D.

Kevin Eastman - Wikipedia

A metal foam is a cellular structure consisting of a solid metal (frequently aluminium) with gas-filled pores comprising a large portion of the volume. The pores can be sealed (closed-cell foam) or interconnected (open-cell foam). The defining characteristic of metal foams is a high porosity: typically only 5-25% of the volume is the base metal. The strength of the material is due to the ...

Metal foam - Wikipedia

I especially love the effect she achieved with the metallic gold paint. It gives the striking illusion that the candleholder really is covered in a cool metal sculpture and not just dried glue! Just looking at this, I get so many different ideas for cool patterns and colors you could try! Project Source and Instructions: curbly. 17.
