How Health Systems Are Meeting the Challenge of Climate Change

Overview. Primary head injury can be catastrophic, but the effects of repetitive head injuries must also be considered. Second-impact syndrome (SIS), a term coined in 1984, describes the situation in which an individual sustains a second head injury before the symptoms from the first head injury have resolved.

Repetitive Head Injury Syndrome | BrainLine

Genie (born 1957) is the pseudonym of an American feral child who was a victim of severe abuse, neglect, and social isolation. Her circumstances are prominently recorded in the annals of linguistics and abnormal child psychology. When she was approximately 20 months old, her father began keeping her in a locked room.

Genie (feral child) - Wikipedia

Mental Health Status Examination and Screening–Pediatrics (<18 years) While there is currently no “gold standard” for pediatric mental health screening, the emerging best practice for the mental health status examination is a structured or semi-structured assessment that is integrated into the overall health assessment.

Guidance for Mental Health Screening during the Domestic ...

Brenda M. Sabo, Mary L.S. Vachon, in Supportive Oncology, 2011 Self-awareness as a mechanism for enhancing self-care. Self-awareness involves both a “combination of self-knowledge and development of dual-awareness, a stance that permits the clinician to simultaneously attend to and monitor the needs of the patient, the work environment, and his or her own subjective experience.”
7 When ...

Signs of a Cannabis Use Disorder. In order to be diagnosed with a cannabis use disorder, a person must manifest at least two of the 11 symptoms that the DSM-5 sets forth, and they must occur in the same 12-month period. The number of symptoms determines whether a person is diagnosed with a mild, moderate, or severe cannabis use disorder.

Course Help Online - Have your academic paper written by a ...

It reads both blood oxygen saturation levels and heart rate and delivers both in an incredibly simple, read-at-a-glance visual display. Both the numbers face the user, which is great if you're looking for a device you'll take readings off of yourself, but can be annoying if a caregiver is the primary user.
