The Nikon F2 is a professional-level, interchangeable lens, 35 mm film, single-lens reflex (SLR) camera. It was manufactured by the Japanese optics company Nippon Kogaku K. K. (Nikon Corporation since 1988) in Japan from September 1971 to 1980. It used a horizontal-travel focal plane shutter with titanium shutter curtains and a speed range of 1 to 1/2000 second (up to 10 seconds using the self ...

### Nikon F2 - Wikipedia

For portraiture and event photography, there are pros and cons to both systems, and neither is necessarily ahead. For dedicated wildlife and action photography, Nikon's DSLRs still have the advantage today, although the gap is narrowing. The traditional form-factor of the 35mm single lens reflex (SLR) evolved in the 1950s and was subsequently refined over the next half century. For many folk during this period, the range of Nikon SLRs, from enthusiast, to semi-pro and professional, provided a ladder of increasing capability as their photographic journey progressed.
