Our Babies Ourselves How Biology

I state this fact to underscore a point: Human babies, and human adults for that matter, are animals. We are primates, a kind of mammal, and our babies are animal babies. Although humans like to think of themselves as unique, we share much of our physiology and behavior with others of our kind, with other primates.

Ethnopediatrics--the study of parents, children, and child rearing across cultures--is the subject of anthropologist Meredith F. Small's thorough and fascinating book Our Babies, Ourselves. Small asserts that our ideas about how to raise our kids are as much a result of our culture as our biology, and that, in fact, many of the values we place on child-rearing practices are based in culture rather than biology.
