These are books in the public domain, which means that they are freely accessible and allowed to be distributed; in other words, you don't need to worry if you're looking at something illegal here.

### What Is Mathematics Really Reuben

Platonism about mathematics (or mathematical platonism) is the metaphysical view that there are abstract mathematical objects whose existence is independent of us and our language, thought, and practices. Just as electrons and planets exist independently of us, so do numbers and sets. And just as statements about electrons and planets are made true or false by the objects with which they are ...

In mathematics, this is a problem of finding the number of combinations of numbers with the same sum. If we were interested in just the collection (of coins) as a whole so that  $1+2+1$ ,  $1+1+2$  and  $2+1+1$  are the same since all contain a single 2 and two 1s, then we are counting partitions of an integer.

In Excel, like Reuben says, the formulas that will probably work the best are VLOOKUP and HLOOKUP. In both cases, you match on a unique row and it returns the value of the given column\row to the left\down from the found id. If you only want to add a couple extra fields to the second list, then add the formulas to the second list.

On windows cmd prompt, the ^ character is the escape character! Therefore, on cmd, you have to type ^^ to tell cmd you want a single literal ^ and that your not escaping something else after it. What's happening to many people is that the ^ is followed by a space. So cmd thinks you're escaping the space -- which yields simply a space character.
